

So, this is the reflection of this PA.

Well I think, this is quite a challenge for me to summarize these data. Although I only wrote about 700 words, these data are very difficult to extract information out of this whole bunch of data. From this activity, or say, this assignment, I felt a strong feeling of respect to the librarian and all the people who work with processing data. These people are actually dealing with the data that are more complicate to get used to or get information and far more difficult to extract things or summarize from it.

Now I think I should say something about what I've learned from this assignment. Firstly, I learned that every job is hard as long as you want to get it done perfectly. Secondly, I learned that what should a librarian do in his job. And what those book sections are. Lastly, I think it is a brilliant way to review or to get know how can our knowledge be used in the real world. It will definitely make me feel like want to learn more in the future because now I can assure that the knowledge isn't only a thing that we must learn from teachers or books when we are young. It can really be used in the real life. So I appreciate that.

Hope I can get a full mark in this assignment hhhhhhhh.
