

总结. 有关针对歌曲的艺术创作。

My main work is to think about another kind of drawing art about voice and music. I have seen lots of art work about a song or a music. But a big part of them is just draw what the sound like. I can not get and feel the main emotion from the music by these arts.

So, I want to try from the vision of the whole song feeling, not only the sound listen like. At first, I do not knew the main way. So, I listen to my chosen music---YouSeeBIGGIRL/T:T, one of the back ground music of the famous animation, Attack On Titan. I try to draw want I feel when I listen the music, not only my own thinking , but also the emotion that the music want to tell. At last, I get three kind of patterns.

The next question is how to use these patterns. These patterns just the emotions of the parts, not the whole emotion. I must use the whole emotion to organize the patters. It become the main thinking of my art trying: use a big order to organize the small parts.

This song is very sorrow and oppressive. So, I check some art about Cthulhu Mythos. And then I use the color with black and red.

After finish the final work, I also try about another music in this thinking. I choose MaTa ASiTA, the ED of the animation called Madoka Magika. It is perfect.

I also try when was sleeping, but not to good.
