

Reflection of colorful sound of light

After the projects of light and sound ,and ELP, I decide to change a way to finish my final project of IP. By the way, I was writing my own novel. So, If I finish the project by writing a art novel, it will be a pretty new thing of my art work.

In order to be easier to design the storyline and roles of the novel, I use the world view of my own novel. Because my projects at before are always talk about the relationship of light, sound with human. I think my novel`s main thinking will not change from it.

Okay, the first step I should do is to search of some material of the story. I read many novel, such as *The Alchemist* . I learn how to write people`s thinking and emotions with the objective facts. I also think about my last project and ELP too.

After that, I use the material to build the main thinking, that what I want to tell the readers by the story. And I finish the design of my novel`s story lines. The writing way is a trying of a pretty new way for me.

At this time, I find that only a novel is not enough for a project. I need something other to help it. I decide draw some picture for the novel. But, not in pan. I want to try a pretty new way of art-----collage.

My story is about a "bugman "(my own fantasy live) physical scientist`s live. He will kwon many things of what is objective facts and people`s emotion feeling.

I start to write. At first, I don't get any problem, every is alright. But when I start to write the taking of my roles (Ablaze Jockro and Optical Wave) , I stuck. It is very very difficult to accurate grasp the thinking and feeling of the roles by words. Because of that , I must make my final work shorter. I think I should more carefully of the situation like this. If I can design the thinking and emotions of the roles earlier, maybe it will not become this.

At last, I finish two chapters and two collage(it was very fun) pictures as my final work.
